Office of Customer Education and
Outreach, Commodity Futures
Trading Commission, US

As part of IOSCO's World Investor Week, this webinar will discuss some of the latest trends of online investment scams and fraud from regional and global perspectives. It will also offer insights into enforcement strategies and investor education initiatives, as well as how behavioural science can help investors make safer investment choices for themselves.

Join us to learn about safeguarding investments and enhancing financial literacy against sophisticated online threats in today's digital financial landscape.

The session will last approximately 60 minutes, including time for Q&A.

REGISTER HERE

The Webinar is open to all IOSCO members and members of the public
